

Movie Industry Analysis for New Studio

Data-Driven Recommendations for Film Production Strategy

Group 5 = Angela Mukami, Samira Hussein, Winnie Wasike, Tyrese Mugo, Georgina Oduol, Tafford Pessah

December 2025

Business Challenge

Our company is creating a new movie studio

We need to understand what types of films perform best at the box office to guide production strategy.

STAKEHOLDER

Head of New Movie Studio

KEY QUESTION

What types of films to produce?

Data Sources

BOX OFFICE MOJO

3,387 movies (2010-2018)

Domestic and foreign box office revenue data

IMDB DATABASE

9,426 movies (2010-2018)

Film genres, runtime, and ratings

Merged Dataset: 1,778 movies with complete data

Finding 1: Genre Performance

Adventure and Action dominate revenue

\$93M

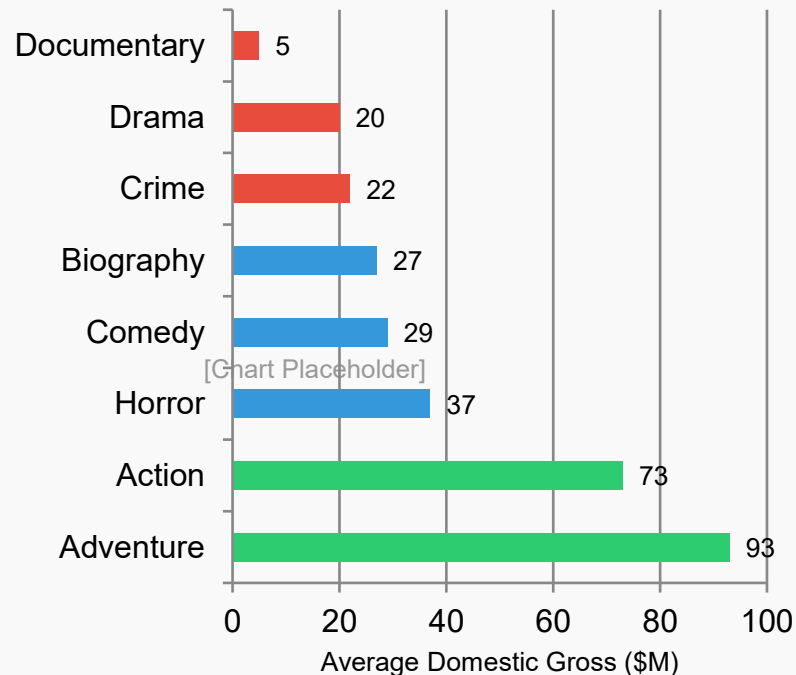

Adventure films average

\$73M

Action films average

2.5x

Higher than low performers

Finding 2: Runtime Impact

Longer films generate higher revenue

\$66M

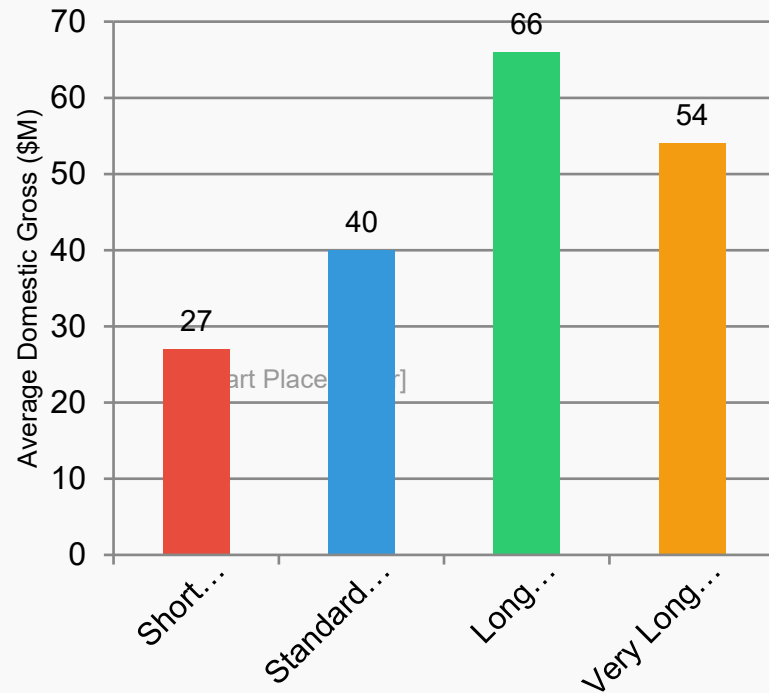

Long (120-150 min)

\$40M

Standard (90-120 min)

\$27M

Short (<90 min)

Finding 3: Optimal Runtime by Genre

Each genre has an optimal runtime

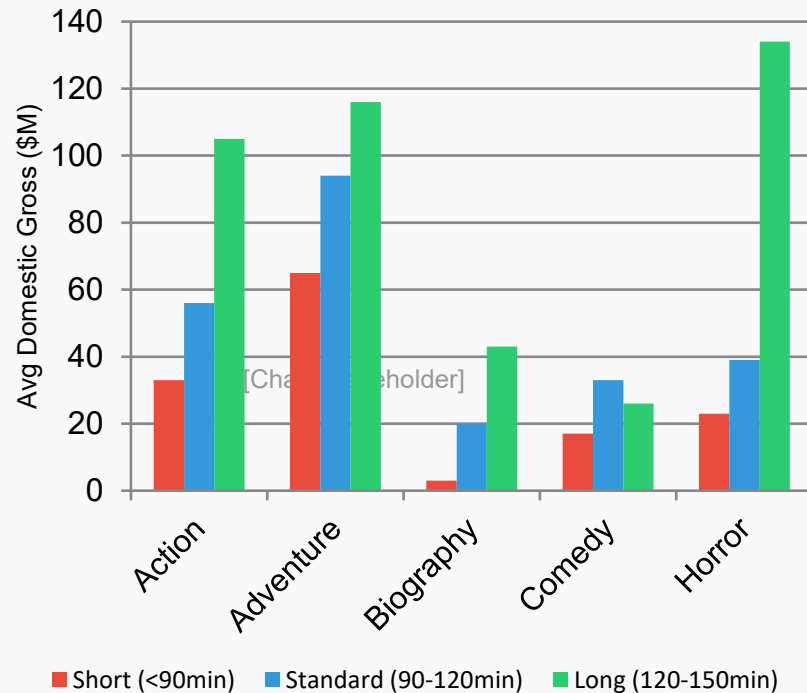

Adventure: 120-150 min | \$116M

Action: 120-150 min | \$105M

Horror: 90-120 min | \$39M

Comedy: 90-120 min | \$33M

Make genre and runtime decisions together

Strategic Recommendations

1

PRIORITIZE ADVENTURE FILMS (120-150 MINUTES)

Focus on Adventure films at optimal runtime for maximum return

2

INVEST IN ACTION FILMS (120-150 MINUTES)

Allocate 30-40% of the budget towards Action films as the second best option for stable, high returns

3

MINIMUM 90-MINUTE RUNTIME STANDARD

Avoid short films and Documentary/Drama focus

Expected Result: \$80-100M average per film vs. industry average of \$35M

Thank You
